

September Presidents Report

Last month the Volunteer dinner was held on Saturday, September 15th. All Board members need to plan on attending to help serve and those that would like to help cook let me know. We will be having Cuban food with a Luau theme.

This month we have had two residents pick up forms to contact the USDA Wildlife officers to start the process to help with the Boar issue on their property. The POA only provides the forms to the residents and documents the sitings. It is between the homeowner and the Officer to determine if there is a problem and how to deal with it.

Both the Cumberland County and Putnam County Roads Department has been out repairing our roads this month. Cumberland Cove Road was repaved and marked during this repair while other roads were tarred and chipped. I have sent Thank you cards to both the Cumberland County and Putnam County Road Department thanking them for the work they have done so far on our roads.

We are still waiting for the Drivers Insurance company to approve and send a check to us to repair the entrance at East Cove Road. Once the check is received repairs will begin.

The Accountant had some emergency issues come up and had to delay reviewing our 2017 books. The Accountant advised that the books were in great shape and shouldn't take too long to complete.

The Firewire committee will be holding a Firewire S-190 class on September 17th. If you plan on attending you need to RSVP by September 13th.
