

1. Call Catoosa Water District Office and request connection to waterlines in front of your property. (1-931-277-5126 & Get directions to their office)

2. Go to the Office on Plateau Road and fill out request forms and pay \$850.00 tap fee and a \$50.00 one-time hook-up charge. The friendly folks there will explain all details of delivery of city water to your property. If you think that you have special needs talk with them.

3. Water lines from the street where your meter will be placed to your home will be the **homeowners' responsibility (Not the POA)**. Jack Fawcett, a Cove resident has been recommended for laying water lines to a home. Several other people are doing the same job. Another person mentioned is Monte Garrett who works for Catoosa.

(The above information was given to me by homeowners who now have water and by the Welcome Center.)
